

HUGO NYBERG

GAME PROGRAMMER

karlhugo.nyberg@gmail.com | +4672 743 36 50 | Stockholm | hugonyberg.github.io/

PROFILE

Game programmer with a strong interest in gameplay and AI systems, currently finishing the final internship phase of my education at The Game Assembly, with all courses completed.

I enjoy building the systems that make games feel good to play, whether that's gameplay mechanics or AI behaviors that make characters feel responsive and believable. I've worked with both C++ and Unity, and I'm comfortable taking features from idea to implementation.

Through my projects and industry experience, I've collaborated closely with designers and artists, and contributed to released games. This has given me a good understanding of how to work in a production environment and deliver complete gameplay features.

I'm now looking to step into a full-time role where I can continue growing as a programmer and contribute to creating engaging and well-crafted games.

SKILLS

Programming Languages

- C++
- C#

Core Competencies

- Gameplay Programming
- Game AI (Behavior Trees, Steering Behaviors, GOAP)
- Systems Design
- Object-Oriented Programming

Engines & Tools

- Unity
- Custom C++ Game Engine
- Git

Technical Areas

- Real-Time Systems
- Networking (UDP, Client-Server)
- Performance Profiling & Optimization
- Rendering & Post-Processing
- AI-Assisted Development (structured workflows for rapid prototyping, debugging, and iteration with full code ownership)

EMPLOYMENT HISTORY

Filimundus – Programming Internship	09/2025 – Current
Hyre AB – Customer Service Representative	02/2023 – 08/2025
Coop – Supervisor & Sales Associate	12/2020 – 08/2022
Hotel J – Front Office Manager	02/2018 – 02/2020

EDUCATION

The Game Assembly – Game Programmer	09/2023 – Current
Actors Studio Stockholm – Theatre	08/2016 – 08/2018
Santa Barbara City College – English & Theatre Arts	08/2015– 04/2016
Åva Gymnasium – Teknik	08/2010 – 06/2013

PROJECTS

Drawing Game (Unity, Filimundus Internship, TBA)

- Built file system for persistent user data and implemented UX flows for responsive drawing
- Enhanced existing drawing system and created a custom glitter shader

Minigames (Filimundus Internship, Released)

- Developed two released minigames from scratch in a production environment
- Ported a legacy minigame into a new system

BRIO World – Railway (Filimundus Internship, Released Title)

- Contributed to gameplay systems in a shipped commercial title
